# InteractiveLSProxy

The minimum interface definition for an InteractiveLabServer. Currently only one method, additional methods may be added as needed.

The following operations are supported. For a formal definition, please review the **Service Description**.

- **Alert**
  Alert is used by the LabScheduling Server to notify the lab server about a scheduled event other than an experiment execution. The actual payload format and response to this method is be determined by the LSS and LabServer implementation. Currently NOP in reference implementation.
