

9-7-2011 Current changes that are in the Pipeline are:

- @Stellar mobile went into production 9/1
- Mac OS X 10.7
 - SAPGui users should not upgrade
 - Heimdal Kerberos fix in 10.7.2 – Apple release date TBA
- Identity Finder 5.1 for Mac — release of 9/9
- Smart Fixed Assets — Moved to 9/29
- SAPGui Document Attachments — Moved to 9/15
- TSM Backup Servers - backup H on 9/8, backup L on 9/15. The schedule will be same as noted earlier post-hold.
- Kerberos Extras — New version testing on 10.5 and 10.6. Will release in conjunction with 10.7 support. Will need education surrounding Personal Ticket acquisition due to functionality elimination in Heimdal
- Online Reg—working smoothly, still ongoing
- UA App Servers—Move from physical to virtual servers on 10/1
- Apache Patches—O&I is currently patching all instances we run of the Apache web server in response to a DoS (Denial of Service) security issue made public one week ago. Environments we've patched to date include:
 - All web services environments (dev, test, stage, and production)
 - All IS&T web site environments
 - Concur travel application (dev and production environment)
 - MITID web services
 - Roles web application
 - WebMoiria application
 - Stellar dev and test environments; production is tentatively scheduled for this coming weekend
 - Many departmental applications
 - Student systems based on Oracle Application Server make use of an older version of Apache (version 1.3) necessitating a configuration change workaround. This is being rolled out to development environments 9/7 and 9/8, and is tentatively scheduled for production 9/10-11, pending approval
- SAP SH2 System Refresh — Available to project teams on 9/9
- FileVault2—Will be recommended Hard Disk Encryption tool for OS 10.7 (Lion) due to no PGP solution. Announcement pending 9/9 detailing known issues for existing early adopters & future support
- Diginoter Certificate Authority – 3rd Party SLL provider issued a compromised ca. Microsoft, Firefox, Chrome all released updates to revoke trust status. Safari/Apple has not. Has been escalated to Apple

Ongoing work:

- Fire Fox 6 testing **DO NOT UPGRADE**
- Mac OS X 10.7.2 testing
- Doreen Evans & Associates consulting (Admin Systems, O&I, Finance)
- Software Release Team Portfolio evaluation
- SciQuest configuration testing with Safari (10.6.8 security update)
- Touchstone security patches
- MITSIS Java 1.6 upgrades
- BSI (SAP tax server) upgrade to v9 (currently evaluating test)
- Actual OBDC Connector testing on 10.7 (license now available)
- Fetch 5.6 installer writing
- VMWare Fusion beta testing
- F5 software testing for Kerberos 4 and 5
- Browser release evaluation
- IE 10 preview testing
- Oracle RAC virtualization
- IPTV Comcast device roll out
- Gradebook Module pilot

Changes/work that is currently pending (exact date to be determined):

- Exchange 2010 Server upgrade (DNS push) moved out to mid Sept or later
- SAPgui 7.20 Rev 1.2 for Mac decommissioning
- SAPgui 7.10 Patch Level 15 (7.10.15) for Win decommissioning
- X-Win 32 2011 release
- sais.mit.edu to vm
- Quality Center upgrade
- MIT Wiki upgrade from Confluence 3.4 to 3.5
- IPTV roll out of Comcast stream
- UC4 Job Scheduler (SAP) December 2011
- Secure wireless announcement in progress

Upcoming Business Events to keep in mind:

- Fall Readiness 8/15-9/15: For specific details, please see Hermes article: <http://kb.mit.edu/confluence/x/FlAmAg>
