

Jonathan's Design 2: Localized and Specific Feedback, using clicks and inputs on picture, scrollable view, timeline of feedback (versioning), filters, for visualization.

Reviewer points & click To add comment on piece, marked as symbols.

- Timeline marks comment from reviewer
- Reviewer can drag timeline under the art & will update the art version and show his/her previous comments

Jenny can see visual feedback on the artwork. Clicking on a symbol will bring the corresponding comment.

Comments not yet seen have a blinking symbol

- Timeline and Art Piece show aggregation of All comments, by version, type, group
- For each Type of comment (Technique, content, color...): Jenny can select / unselect what she wants to see (by group) and can scroll over timeline to see comments from different version of her piece.

Pressed button darkens, filters the comments on the frame.
